9:00-13:30	**Parallel Sessions**
10:00-11:30 Room P04	Workshop. **Beyond the algorithm: human wisdom and values in AI-enabled management** The workshop will cover the managerial implications of AI beyond efficiency, addressing the limits of algorithmic reasoning in contexts that require moral discernment and, in this regard, the role of human wisdom, values, and spiritual knowledge in any potential responsible AI-enabled management. The session will discuss the risks of delegating decision-making authority, accountability, and human agency to AI systems, as well as how organizations can integrate AI while preserving dignity, trust, responsibility, and the common good. Facilitator: **Florina Pinzaru**, Professor and Dean of the Faculty of Management, SNSPA Guest speaker – opening reflection: **Constantin Brătianu**, Professor Emeritus, Faculty of Management, SNSPA
13:30-14:30 4th floor	**Lunch**
14:30- 16:00 4th floor	**Parallel Sessions**
14:30-16:00 Room 410	Workshop. **Future-ready cultures: building organizations that thrive under uncertainty** Artificial intelligence, demographic change, geopolitical shifts, and new expectations about work are reshaping organizations at a fast pace. However, technology alone will not determine the future of work. Organizational culture, through the shared values, behaviors, leadership practices, and environments that shape how people collaborate and innovate, will become a defining competitive advantage. This interdisciplinary workshop explores how organizations can cultivate cultures that are resilient, human-centered, and future-ready. The discussion will examine how AI is transforming work, how leadership must evolve to build trust and adaptability, how diversity fuels innovation, and how physical and digital workplaces can foster collaboration and creativity. What kinds of cultures should we intentionally design today so that organizations and the people within them can thrive tomorrow? Facilitator: **Andreea Mitan**, Associate Professor and Executive Director of the Center for Research in Management, SNSPA

	Guest speakers: • **Mariana Nicolae**, Prof. Emerita ASE Bucharest, Romania • **Jacob Emil Klingen Borg,** Architect, LPO architekter, Norway • **Mihai Lazăr**, Cyber Security Manager Deutsche Bank, Romania • **Cătălina Cicei**, Associate Professor, SNSPA, Romania
14:30-16:00 Room 420	Academia-Industry Dialogue Track / Roundtable: **Digitalization and Experience. Insights from Wine Tourism / Wine Commons** Wine tourism connects vineyards, cellars, landscapes and architecture with living knowledge, rituals, foodways, identities and intergenerational skills. Yet wine territories face climate disruption, seasonality, labor shortages, demographic change, and unequal distribution of benefits. WINE COMMONS asks how cultural tourism can distribute value more fairly, sustain everyday heritage and reinforce communities' power to shape development. Looking ahead, WINE COMMONS seeks to bring researchers, businesses and community organizations together to co-design and test these approaches in participating wine territories. Prospective partners are invited to contribute practical challenges, expertise and potential pilot settings, helping shape visitor experiences and business models that create lasting value for both enterprises and local communities. Moderator: **Ralf Wagner,** Professor and Chair of Sustainable Marketing, University of Kassel, Germany
15:00-16:00 Room 427 & online	**Roundtable (hybrid): From Academia to Mars: Mapping the Future of Space Economics** Space economics is rapidly developing from a largely descriptive field into a more rigorous area of academic inquiry capable of informing major policy decisions. As governments and businesses become increasingly dependent on satellite infrastructure, Earth-observation data, and space-enabled services, economists are beginning to examine not only the size and structure of the space economy, but also its effects on productivity, public administration, energy security, sustainability, and economic development. This panel will assess the current state of space economics, examine the field's emerging research agenda, and demonstrate how space-based technologies are already reshaping economic policymaking on Earth. Speakers: • **Ioana Petrescu**, Director, Center for Leadership and Innovation, National University of Political Studies and Public Administration (SNSPA); ESPI Global Fellow • **Leonardo Meeus**, Director, Florence School of Regulation, European University Institute • **Marco Aliberti**, Associate Director of International Engagement, European Space Policy Institute Organizers: European University Institute, European Space Policy Institute, National University of Political Studies and Public Administration – Center for Leadership and Innovation
